The Wayne Works,
Richmond, Ind.

Gentlemen:

Under separate cover I am sending you a photograph of the bus body we recently purchased from you for the Pipestone Indian School.

You will notice this body is mounted on a Model "AA" Ford truck, and certainly makes a wonderful job. Wish to advise that we are more than pleased with this body.

Mr. J. W. Balmer, the man standing in the picture, who is Superintendent of the Indian affairs at Pipestone, is very much pleased with this body. He said that he would be very glad to recommend this body to any one interested in purchasing a school bus. There are about two hundred Indian children at this school which is located about two miles north of Pipestone. At the time this picture was taken we had just delivered the bus to the school, and you can see by the picture that all of the two hundred children tried to get in the bus.

Yours truly,

Hicks Motor Company,

HEJ:FG
