

# *All Your Cylinder Grinding With One Hone! This Is Only Possible If You Own a Buffalo Heavy Duty Hone.*

It is the most economical hone grinder from any angle. No other single hone selling for \$52.00 or less will grind or hone cylinders between 2-5/8" and 4-1/8".

The first cost is a great deal less than the cost of any two hones and when you consider buying a hone, ascertain if your work requires one Buffalo Hone or two hones of any other make.

Replacement stones (full length) for Buffalo HEAVY DUTY Hones also cost you less.

Oversize adjustment has always been a feature of Buffalo Hones; inaccurate oversizing is impossible when using a Buffalo Hone—and, going from one cylinder to another does not affect or alter this adjustment. Think it over and buy right!

Your complete purchase at \$52.50 includes two sets of stones, a long and a short driver, one rubbing stone, complete instructions and a sign for your window.

## **NOTHING ELSE TO BUY**

*Your Jobber has it or will get a Buffalo Hone for you—or write us direct for circulars and prices.*
