

# New awning that fastens without bolts or screws!

LINCOLN Side Auto Awnings are easily and firmly attached by spring tension — no bolts, screws, or bother! Spring tension also holds the material stretched taut and smooth — no flapping or sagging! Coverings are of

sporty awning patterns in heavy weave and gay color. The popular STANDARD and DE LUXE ROLLER types attach rigidly in a moment. STANDARD folds up to window top when not in use, and the DE LUXE ROLLER may be rolled up from its extended position or completely down as a curtain. These Awnings are made in few sizes and fit all closed cars perfectly.

Our new OPEN CAR type gives access to an untouched market. It fastens to the bows with thumb screws and folds out of sight under the top when not in use. Over a third of a million LINCOLN Awnings were sold last year. This season LINCOLN Awnings are leading in sales again and setting a new high record. Start showing LINCOLN Awnings to your customers NOW! (You'll sell them if you show them!) Order from your jobber at once—or write us today for free samples and prices!
