

# Garages *and* Service Stations Make Good Profits Charging Batteries ~

50 cents can  
make \$8 to \$10  
for you in from  
12 to 20 hours

If you are not charging batteries in your shop now, you are letting profits slip away from you. Worse than that, customers who are going elsewhere for battery service may become somebody else's customer for all their service.

Let us tell you what the profits are in charging batteries and how you can make those profits with a Valley G-10 garage type charger. Write for details.
