

APCO Starter Pedal No. 32, handsomely finished and easily installed; brings the starter in easy reach and increases the leverage. No holes to drill. List \$1.00—Dealer 65c.

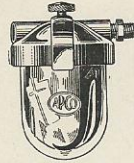

Wheel Puller No. 34 is the only type capable of working on Model "A" without injury to shaft or hub. Flange engages hub when puller is placed in position. Malleable iron body; tool steel screw. List \$3.00—Dealer \$2.00.

APCO Shimmy Stop No. 20—for Model "A" and all other cars. Eliminates the dangerous shimmy prevalent in many balloon tired cars. Positively cuts out wobbling without making steering harder. List \$1.00 a pair. Dealer 65c.

Valve Grinder No. 53 is the only type grinder for the new Ford Valves. As there are no slots or holes in the "A" valves, a vacuum cup tool is needed. This one fills the bill perfectly. List 50c—Dealer 35c.

Gasoline Filter No. 39-A removes the water and foreign particles from the fuel by forcing the gasoline to flow from bottom to top. The glass filter chamber is easily removed for cleaning. List \$1.25.

APCO Anti Rattler No. 22 keeps the radius rod silent. A Zerk nipple lubricates the device and makes long wear a certainty. List \$1.00—Dealer 65c.

APCO Water Pump Spanner No. 18 makes it easy to take up the pack nut—a frequent job on any car. The Model "A" pump has a slotted nut that only this wrench can handle. List 30c—Dealer 20c.

Brake Wrench No. 38 will adjust all four brakes on Model "A". It is made long enough to clear the fenders and reach the necessary points. Also fitted to a just shock absorber and equipped with rubber wiper for cleaning absorber index figures. List 50c—Dealer 35c.
